

Likely, Unlikely

Parents, we will need your help for this assignment.

On the index card provided, please write for your child or help your child write 3 statements using the following guides:

- 1) Something that you and most, but not all, students like or have done.
- 2) Something that you and at least one other person, but not many students in the class, like or have done.
- 3) Something that is unique to you and that probably no other student likes or has done.

For example for me I might say:

- 1) I like pizza.
- 2) My favorite subject is science.
- 3) I've hiked on the Great Wall of China.

We will use a few of these cards for our sharing each day. First, all students will stand up. As I read each clue, all students who don't match the clue will sit down. This is a fun way to get to know more about how we are alike and how we are different.

Stumped for ideas? Think of a favorite food, color, sports team, or holiday. How about naming a sport you play, place you have been, where you were born, where your grandparents live, number of siblings you have, something you collect, a hobby or activity you enjoy, or something you can do.

Thanks for your help, parents!
